PROFESSIONAL SUMMARY

Motivated Programmer with experience in publishing automation, web development, and accessibility compliance. Skilled in streamlining workflows, optimizing efficiency, and delivering responsive digital solutions using modern frontend and backend technologies. Hands-on expertise with JavaScript, JSX, and React.js, with strong problem-solving focus on usability, performance, and scalable design.

EXPERIENCE

July 2025 - Feb 2026

Aptara Pvt Ltd

Trainee Programmer

- Automated design workflows with JavaScript/JSX to streamline repetitive layout tasks.
- Built scripts for page layout generation, guide insertion, margin adjustments, and object alignment.
- Reduced manual formatting time and improved layout consistency.
- Enhanced accessibility by scripting alt-text and metadata tagging.
- Collaborated with publishing teams to integrate automation into document workflows.

July 2021 - July 2022

Tata Motors Ltd

DAT

Focused on providing technical service and support through detailed documentation, reporting, and workflow tracking in Excel, while assisting industrial operations.

EDUCATION

2022 - 2025

Amrapali Group of Institue
(UTU)

B.Tech (Computer science Engineering)

Final Year Project: SK Junction (E-commerce Platform) — designed and developed using the MERN stack, featuring a responsive React.js frontend and a structured Node.js/Express backend with MongoDB integration.

2017 - 2020

Govt. Polytechnic Srinagar
Garhwal (UBTER)

Diploma

Built a foundation in programming, database management, and software development, with exposure to AutoCAD programming concepts. Applied computational logic to design workflows and technical drawings while practicing automation techniques that connected design and coding.

SKILLS

- Programming & Development:** Java (Core java, OOPs concepts, Java 8, Collections framework, File Handling), Spring Framework and Spring Boot, JavaScript, React.js (MERN Stack), node.js
- Data Structures & Algorithms:** Problem solving, recursion, sorting & searching, dynamic programming, time & space complexity analysis
- Database Management:** SQL (advanced query writing, optimization, joins, aggregations), PostgreSQL, MongoDB
- Testing & Quality Assurance:** Manual Testing, SDLC & STLC knowledge, JUnit, Postman API testing
- Tools & Platforms:** Git, VS Code, Figma, IntelliJ, Maven
- Testing & Quality Assurance:** Manual Testing, SDLC & STLC knowledge, JUnit, Selenium basics, Postman API testing, unit & integration testing
- Additional Skills:** Data Science basics (NumPy, Pandas, Matplotlib), Machine Learning fundamentals, Cybersecurity basics (encryption, authentication), Software Engineering principles (Agile, Scrum), UML diagrams, Computer Architecture concepts

PROJECTS

BaithakHub (MERN Stack Application)

Developed a full-stack event booking app using React.js, Node.js, Express.js, and MongoDB. Implemented user authentication, CRUD operations, and responsive UI with role-based access control for seamless event management.

Voucher Management System (React.js)

Developed a role-based voucher app with authentication (Admin: full CRUD, Staff: create/read only), protected routes, dynamic voucher forms with conditional fields, auto-calculated debit/credit totals, filters, and restricted edit/delete actions for Admin.

Library Management System (Core Java)

Developed a Library Management System in Core Java with file handling to manage books, members, and transactions. Implemented efficient search, issue/return functionality, and data persistence using Java Collections framework.

MediCare(Hospital Management System – MERN Stack)

Built a Hospital Management System using the MERN Stack to streamline patient registration, doctor scheduling, and appointment tracking. Integrated authentication, CRUD operations, and responsive UI for efficient hospital workflow management.
